

Worksheet: 2D Figures Resulting from Slicing a Given 3D Shape

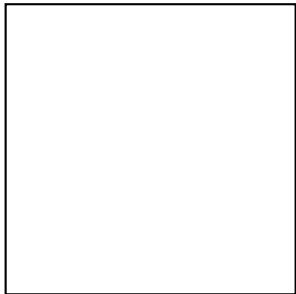

Q1: Determine the two-dimensional figure that results from slicing the given three-dimensional shape as shown.

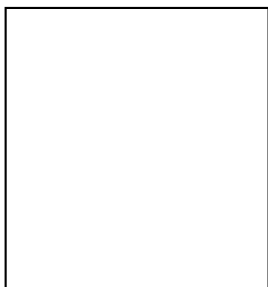

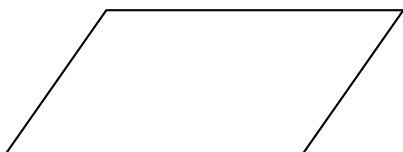

A

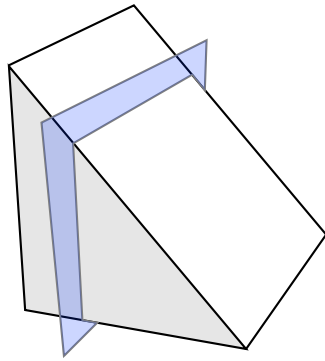

B

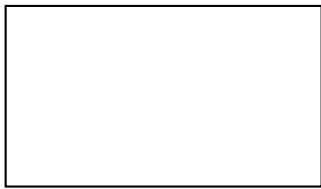

C

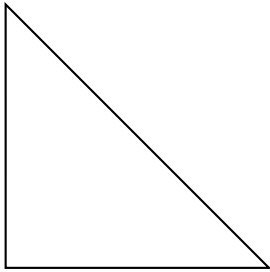

Q2: Determine the two-dimensional figure that results from slicing the given three-dimensional shape as shown.

A

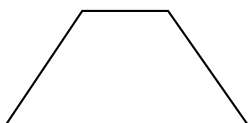

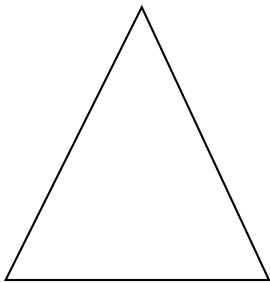

B

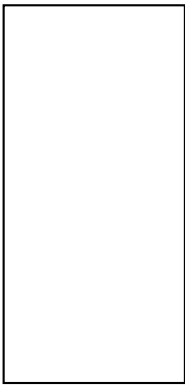

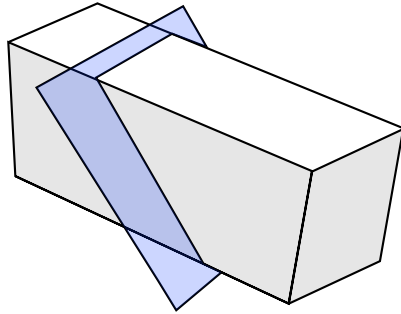

C

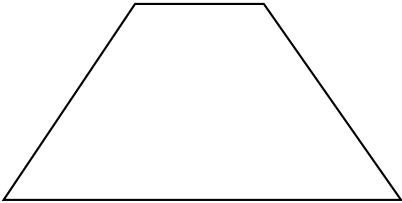

D

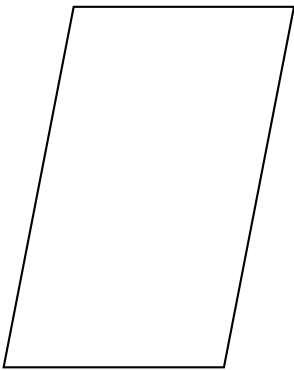

Q3: Determine the two-dimensional figure that results from slicing the given three-dimensional shape as shown.

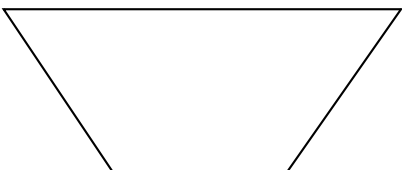

A

B

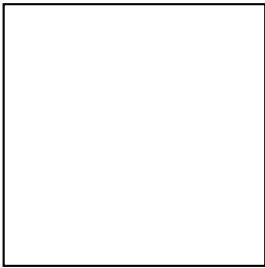

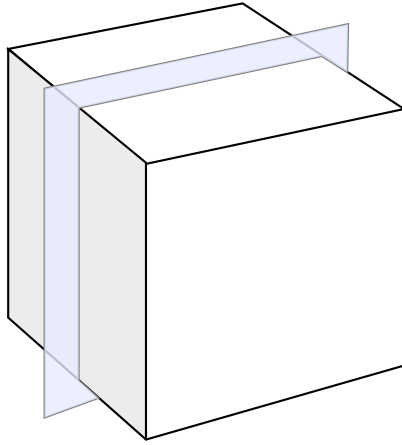

C

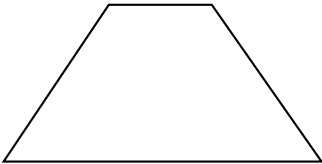

4

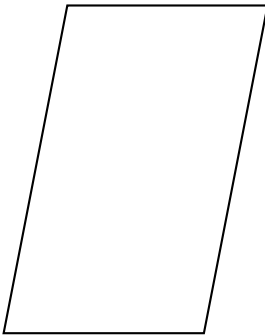

Q4: Determine the two-dimensional figure that results from slicing the given three-dimensional shape as shown.

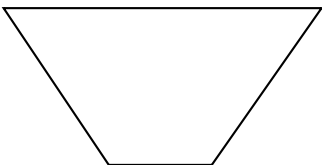

A

B

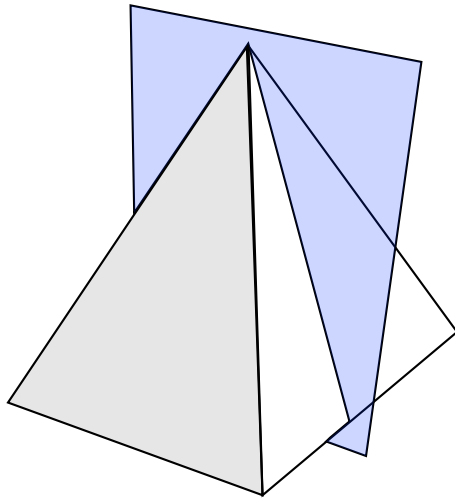

C

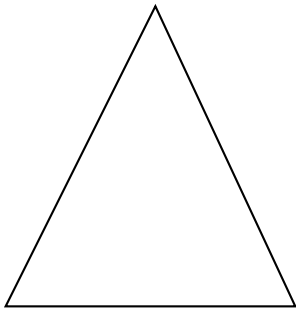

5

D

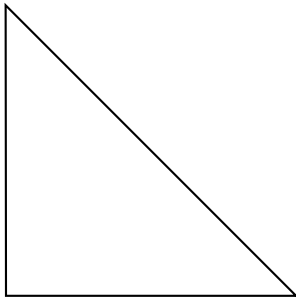

Q5: Determine the two-dimensional figure that results from slicing the given three-dimensional shape as shown.

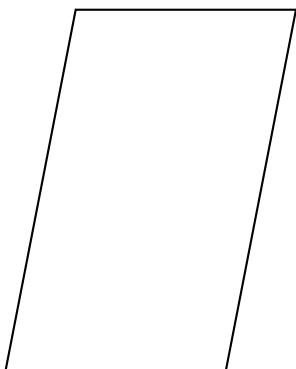

A

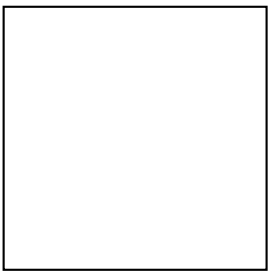

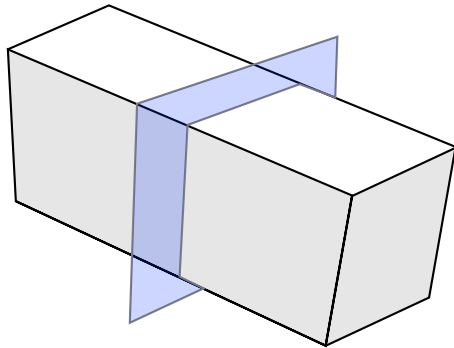

B

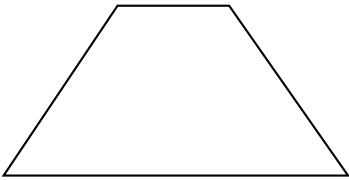

C

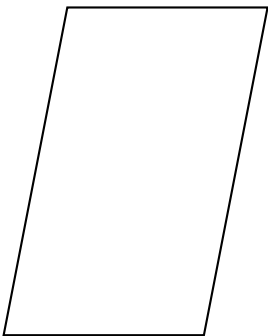

Q6: Determine the two-dimensional figure that results from slicing the given three-dimensional shape as shown.

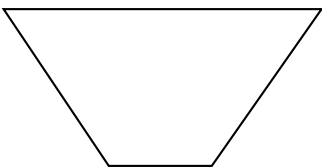

A

B

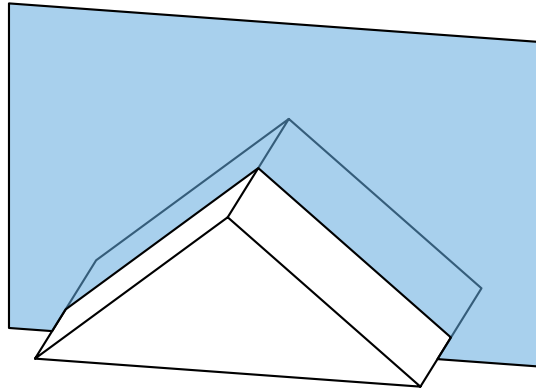

C

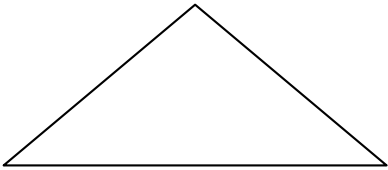

D

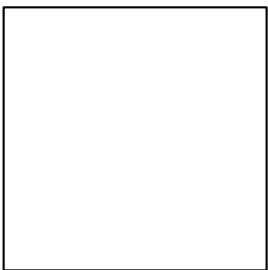

Q7: Determine the two-dimensional figure that results from slicing the given three-dimensional shape as shown.

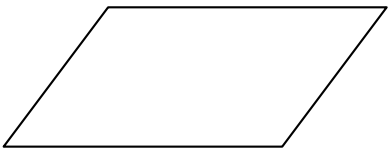

A

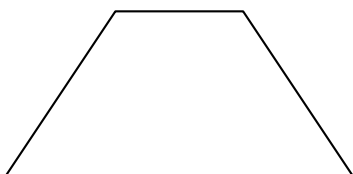

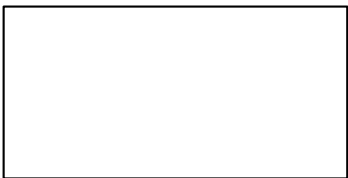

B

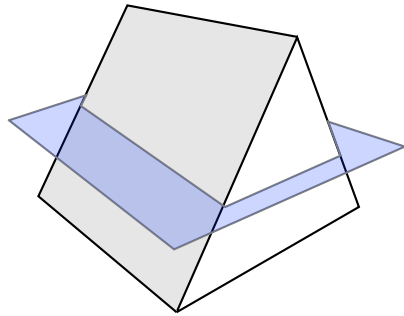

C

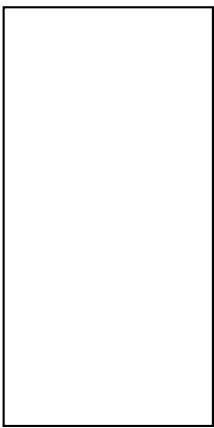

D

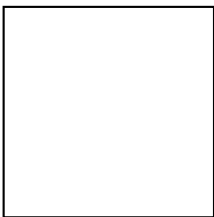

Q8: Determine the two-dimensional figure that results from slicing the given three-dimensional shape as shown.

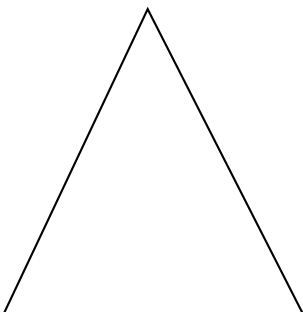

A

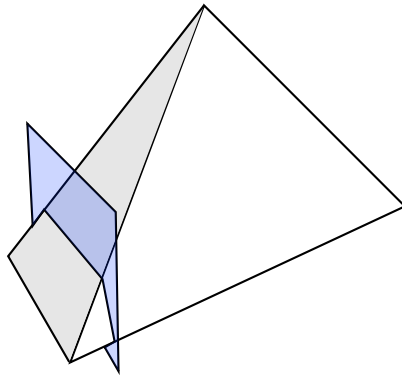

B

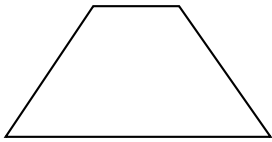

C

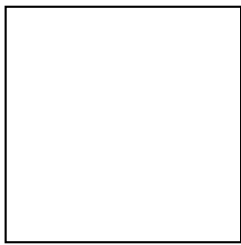

Q9: Determine the two-dimensional figure that results from slicing the given three-dimensional shape as shown.

A

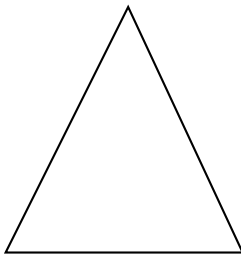

B

C

D

10
E
